Cel-Span® CFA 800

Cel-Span® CFA 800 is an endothermic foaming agent concentrate recommended for injection molding & extrusion applications for a variety of thermoplastic resins such as polyethylene, polypropylene, styrenics, MPPO and ABS. Cel-Span® CFA 800 is recommended for extrusion, and structural foam molding of polyolefins, polystyrene, MPPO and ABS. This product exhibits a very fine cell structure compared to a typical endothermic foaming agent in extrusion applications. This product has been engineered to eliminate splay and to exhibit good surface aesthetics for solid injection foam parts.
